

## **Mikko Strahlendorff**

Mikko Strahlendorff is a ministerial adviser in Finland's Ministry for Transport and Communications responsible for all transport related space matters. He has served before 3 years in the European Commission Global Monitoring for Environment and Security Bureau coordinating the development of Marine, Atmosphere, Climate Change services and the overall architecture. He was also the European Co-Chair of the Earth Observation working group for the EU-Russia Space Dialogue.

Before joining the European Commission Mikko was the Head of the Information System Services unit at the Finnish Meteorological Institute where he has served for over ten years in numerous product and service development functions for operational weather forecasting systems. He is a master of meteorology from Helsinki University in 2003.
