

Walter Peeters

Prof. Walter Peeters is Dean & Vice-President for Academic Affairs at the International Space University (ISU) at Strasbourg, France. After initial management positions in construction and petrochemical industry, he joined the European Space Agency (ESA) in 1983 in a number of project control and management functions, among others in the HERMES project in Toulouse, France. Since 1990, he was involved in astronaut activities as Head of the Coordination Office of the European Astronaut Center in Cologne, with strong involvement in the EUROMIR missions. He joined ISU in 2000, after serving as visiting professor (Non-profit Marketing) at the University of Louvain, Belgium and was nominated as dean of ISU in 2005. He published more than 50 articles on incentive contracting, project management, space commercialization and organization in the space sector and is author of the book *Space Marketing* (Kluwer, 2000). Recent consultancy assignments include activities in the field of space economy (OECD, EC), space policy (Luxemburg, Estonia) and space tourism (Singapore spaceport, Gallactic Suite, Excalibur). He holds bachelor's degrees in engineering and applied economics (Catholic University of Louvain), a Master of Business Administration degree (Louvain, Cornell University) and a Ph.D. degree in Industrial Organization (TU Delft, the Netherlands). He has been recently appointed as director of the International Institute of Space Commerce (IISC), a think-tank based on the Isle of Man as a joint project between ISU and the Government of the Isle of Man.
