

Rey Kawashima

Rey Kawashima served at the University Space Engineering Consortium (UNISEC), an educational non-profit organization that aims to support, facilitate and promote practical space projects such as building and launching hand-made satellites and hybrid rockets at university level, as Secretary General from April 2002 to March 2011, and as Chair of Committee for International Relations from April 2011 to present. Rey Kawashima's academic background includes B.A. in Chinese Literature from Hokkaido University, Japan; Master of Arts in Leadership Studies from Azusa Pacific University, USA and Master of Space Studies from International Space University, France. Rey Kawashima's strong interest in writing brought her an opportunity to publish two books on Cansat project and Cubesat project.
