

Carlos Matilla Codesal

Carlos Matilla Codesal is a student of Aerospace Engineering and Naval Architect in the Technical University of Madrid. In addition of the theoretical education received in the University, he thinks that the best way to acquire knowledge is through active learning. That is why he has founded FuVe, Future Vehicles and Entrepreneurs, a university association which encourages students to create and participate in real projects.

In this association, Carlos has founded and managed the AUV(Autonomous Underwater Vehicle) "Isaac Peral y Caballero" and the UAV(Unmanned Aerial Vehicle) "Juan de la Cierva" projects. Moreover, he has taken part in other competitions like "Airbus: Fly your Ideas", "Beertual Challenge", etc.

He is also convinced about the goodness of the students international mobility. Therefore, he has studied in RWTH Aachen University(Germany) and in the École des Ponts ParisTech(France).
